

Sabal

菜棕属 - **Sabal** (*Palmae*)

causiarum

Origin: Caribbean, where it thrives in sandy areas. Palm with sturdy midrib crowned by 30 green, or bluish-green leaves. Round, black fruits, 1.5 cm in diameter.

菜棕属 - **palmetto**

Origin: USA (Florida, Georgia, Carolina), Cuba, Bahamas. Large palm, with rather rough trunk, and compact spherical crown, made up of large, vivid green, fan-shaped leaves.

Sabal

“Riverside”

Origin: California, where it is famous for its enormous bluish-green fronds and its resistance to frost (has survived sporadic temperatures of -11°C).
